Status:

Hi Raj,  
 My understanding of your situation when I discussed with Dr. Swett and Dr. Mushrush was somewhat different.

However, I will discuss your email with them, hopefully tomorrow, but I do not know their schedule.  
 Meanwhile I think you should follow the residency program schedule outlined by Dr. Mushrush.

Best wishes,

Bob McCarley

Dear Dr McCarley,

I am not sure, if you had a chance to discuss my residency issues with Dr Swett. I have been asked to begin repeating inpatient rotations, starting Monday. The Board requires 9 months' inpatient training, and I have completed 11 months' training (same duration as the other residents of our program), and have passed all of these rotations - many of them with an outstanding evaluation. I do not know, why I am being asked to repeat. If there is no particular reason, I would request you to please allow me to join the fellowship in July. If needed, I will be happy to run out-patient clinics simultaneously.

Regards.

Raj
